## SKILLS

### As student:

Working with productivity applications and collaboration software.  
Data analyzing and interpreting vast amounts of information.  
Academic writing, solving problems and conducting research.

### As computer engineer:

Develop, deployment and post deployment maintenance of software.  
Working closely with the department head to assist the UXD team.  
Assisting the UXD team carrying out mockups to backend/frontend development.  
Improving communication between UX design and backend/frontend areas.  
Acquiring management experience using agile methodologies such as SCRUM.  
Specific skills to integrate areas using multiple programming frameworks.  
Performing some duties as DBA with Microsoft SQL Server and Oracle MySQL.  
Backend developing, programming in Java, PHP, and Microsoft .Net as well.  
Frontend developing, using languages such as HTML, CSS, and JavaScript.  
Integrating backend with frontend using XML, and mostly JSON files.  
Versatile capacity to serve clients in delivering custom technologies.

## WORK

### Software Engineer | Freelance

#### 2012 – Current

**Best Western** Primrose Hotel: Primrose Student Residence Program.  
**CCB&R**, Corporate Currency Bank & Research: Online NFL Game.  
**MapMyFitness**: Humana Fit.

### Software Engineer – Avantica Technologies

#### 2008 | San Jose, Costa Rica

**NavSat**: EzTrack, a GPS device manager through digital maps.

**ROUNDBOX GLOBAL**  
an Idhasoft Company

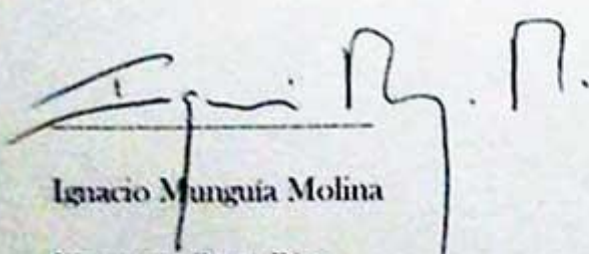

July 15, 2011

Dear Diego Pereira Espinoza:

As a result of market conditions that have become increasingly difficult, Roundbox Media S.A., with legal writ 3-101-421172, has taken a series of measures to reduce operating costs. Unfortunately, the company has decided to terminate the current 3 years of employment relationship that it holds with your person as Software Engineer I. This dismissal does not reflect in any way a deficient performance, and neither is measure of your growth potential in Roundbox Media. However it is necessary to do it, in order to the company can continue operating successfully in the future. Your last day in Roundbox will be July 15, 2011. Attached to this letter, you will be given payment details of Employee Benefits in accordance as stipulated in the Labor Code of Costa Rica.

Please, any question or doubt arising, regarding the termination of your contract, please direct it to Ignacio Munguia (ignacio.munguia@idhasoft.com).

We wish you the best of luck in your future plans.

  
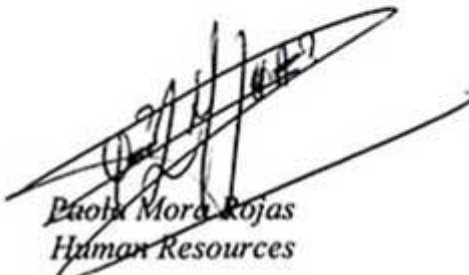

Ignacio Munguia Molina  
Manager, Costa Rica.

*DEAR READER*

*SISCO SYSTEMS COSTA RICA, SA, legal 3-101-138793 card, hereby certifies that  
Diego Pereira Espinoza, ID 0503470814, worked as a Software Engineer I from the day  
June 25, 2007, until the day March 31, 2008.*

## TO WHOM IT MAY CONCERN

I am pleased to write on behalf of Diego Pereira Espinoza.

I met Diego when he enrolled in my Software Design class in 2006. I remember him as a very responsible, organized and prompt student, as well as very interested in academic activities. From his recent communications, I have recognized his excellent communication skills, which has kept and improved through these years; he shows clear thoughts and cares to provide both context and detailed information.

The professional experience and involvement in software development activities (locally and internationally) has given him the necessary maturity to envision new professional goals, which he is definitively capable to achieve.

I believe that the combination of his character, knowledge, interest and professional experience will make him an excellent student, therefore I definitively recommend Diego to any academic opportunity that he is pursuing.

Please do not hesitate to contact me if you need further information.

Lilliana Sancho-Chavarría

ITCR Professor

(M.S in Computer Science from University of Oregon, U.S.A.)
